Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remark, filed 2/28/05, with respect to the rejection(s) of claim(s) 1,3,6,8-11 under U.S.C. 102 and 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Shippert (5,827,224).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Shippert (5,827,224). Shippert discloses a device for applying pressure and absorbing liquid in a nasal cavity, comprising: an insertable shaft (28), an inner component (32) and a hemostatic shroud (24) being made from a gel form absorbent (col. 5, lines 2-25) and a soft tip (48, since the shroud being made from gel/foam material, the tip 48 is inherently soft).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3731

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shippert '224. Although, Shippert does not disclose the absorbent layer being made from the material as claimed, it is well known in the art to make absorbent material from fabric comprised a gel-forming absorbent composition or absorbent fibers knitted or woven together and reinforcing the fiber with polyester or nylon. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the hemostatic material or absorbent material of Shippert for the material as claimed. Wherein so doing would amount to mere substitution of one known material for another that performs equally well in the Shippert's device.

Allowable Subject Matter

6. Claims 3 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose the inner component comprising a balloon.
